

VelocIT Connect Extends Acumatica Payment Function

Fully integrated End to End with real-time post back into Acumatica

VelocIT Paylink allows you to create a link right inside Acumatica that you can share with the customer via email.

In addition to the automated email invoice process, VelocIT Connect allows the standard email invoice process to send batch emails that include the payment links.

VelocIT Connect also supports the Ingenico ISC250 and IPP320/350. Popular with 3rd party solutions such as rental software. The signature capture terminal supports document presentment and customer data collection & acceptance of terms and conditions.

VelocIT is part of the Acumatica Development Network and is able to customize any of our solutions to meet your needs.
