“ [The API] has kept us flexible in responding to quick expansion of our distribution needs. It helps **increase our responsiveness and efficiency** while the flexible API integration allows us to plan ahead and strategize within delivery zones in real-time. ”

- Nora Batho, Fort Point Beer Logistics Manager

ORDERS TO BE SCHEDULED

OPTIMIZED DELIVERY SCHEDULES

WORKWAVE
Routing Engine

Deliver Added Value to Customers & Boost Satisfaction

-  **Deliver up to 40% increased** routing efficiency vs. traditional scheduling approaches
-  **Boost revenue** by servicing more orders/visits per day
-  **Save money** with data-driven routing that reduces mileage and fuel costs
-  **Prepare for higher order volume with our routing algorithm** that integrates with order management systems
-  **Save time** with the ability to optimize routes quickly
-  **Make sure the right vehicles are getting to end customers on-time within shorter time windows** with user-defined rules and constraints tailored to your business and region

“ We knew WorkWave [Routing Engine] APIs provided us with all the functionalities needed to build the auto-routing system. They have a solid base for the output, a good mix of features, performance and price. Since implementing, I've found that we don't have to worry anymore.

We can match the demand to the supply and WE SAVE TIME.”

- Thierry Senecal, Walker Environmental Software Developer
